DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-60 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 1, 11, 18 and 24, are directed to a method of detecting conditions, in which claims recite measuring fabrication data, determining, storing, analyzing and examining the analysis, however no useful, concrete, and tangible result is produced such as using the analysis for control. Claims 2-10, 12-17, 19-23 and 25-28 are included in this rejection because of their dependency.

Claims 29, 39, 45 and 51, are directed to a method of responding to conditions, in which claims recite measuring fabrication data, determining, storing, analyzing, comparing the analysis and responding to the comparison, however no useful, concrete, and tangible result is produced such as using the analysis for control. Claims 30-38 40-44, 46-50 and 52-60 are included in this rejection because of their dependency.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-60 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1, 11, 18 and 24 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are: the preamble of the claims "A method for **detecting conditions** ---- comprising", the body of the claims lacks any type of detection step(s) or what is being detected to control in the fabrication facility. Claims 2-10, 12-17, 19-23 and 25-28 are included in this rejection because of their dependency.

Claims 29, 39, 45 and 51 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are: the preamble of the claims "A method for **responding to conditions** ---- comprising", the body of the claims lacks any type of detection step(s) or what is being responded to control in the fabrication facility. Claims 30-38 40-44, 46-50 and 52-60 are included in this rejection because of their dependency.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 2125

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-60 as **best understood** are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Herberich et al.

Herberich, discloses all the claimed elements of a electronic device fabrication facility, including an automated assembly, a master computer, which determines the route and fabrication procedure (also measure fabrication data for testing purpose), the computer can store the measured data and analyze those data. It is to be understood because of 35 U.S.C. 101 and 35 U.S.C. 112, second paragraph rejection as stated above, and as best understood by the examiner, the facility of Herberich, inherently possess the required method of detecting and responding.

Response to Arguments

5. Applicant's arguments with respect to claims 1-60 have been considered but are moot in view of the new ground(s) of rejection.
